Any construction, use, occupancy or other work requiring a permit, certificate, or approval within the Village's Ordinances shall not commence, resume or continue until all required approvals have been made and all required fees as required by this Ordinance or any other Village Ordinance are paid to the Village Treasurer.

Whenever any construction, use, occupancy or other work requiring a permit, certificate, or approval within the Village's Ordinances is commenced, resumed or continued before such a permit, certificate or approval is issued, the fees for reviewing and processing the application for such permit may be tripled to take account the added difficulty and time required to process the application.

If an application for a permit, certificate, or approval is withdrawn after the review and processing of such application has substantially commenced, the application fee may not be refunded.

If two (2) of the same inspections fail, a re-inspection fee shall be paid to the Village prior scheduling each additional inspection, except for Commercial—including Multi-Family--Electrical Permits, wherein the re-inspection fee shall be paid to the Village if the first inspection fails and prior to scheduling each additional inspection.

Any fees allowed to be paid by credit card or E-Check to the Village will be charged a finance fee for processing the transaction.

**Effective Date: January 1, 2024**

## EROSION CONTROL PERMIT FEES AND CASH DEPOSITS

New Building for Single Family or Two-Family or Razing Permits	\$100/lot or building
Single Family or Two-Family property not associated with a new building/structure, excluding project involving multiple properties.	\$40/ lot of building
Commercial, Industrial, Multi-family, Condominiums, Institutional. Multiple lots and mass grading.	\$150/site plus \$5/1,000 sq. ft. of disturbed site area with a \$2,000 max

**Street Sweeping Deposit:** At the time an erosion control permit being issued for land disturbance associated with preliminary grading, mass grading or any project, other than individual permits for single-family and two-family dwellings or minor land activities, the landowner shall submit a street-sweeping cash deposit of \$2,000 to guarantee to the Village that the conditions of the erosion control permit and this chapter are being followed as they relate to maintaining the public right-of-way and stormwater drainage system. The cash deposit shall be used if the Village determines that the landowner or his contractors have not kept the right(s)-of-way clean from mud tracking, if erosion control measures are damaged or if there is damage to stormwater drainage improvements. The Village shall notify the owner if any mud tracking or damaged erosion control measures or stormwater drainage improvements exist, providing them with a time frame to clean the streets or fix the damaged erosion control measures or stormwater drainage improvement. If the road is not clean and the damaged erosion control measures or stormwater drainage improvements are not completed in the time frame specified, the Village may complete the work and draw upon the street-sweeping cash deposit for the actual costs. If the cash is depleted prior to the project being completed, the owner shall post another cash deposit in the same amount. The cash deposit or any portion, less a 6% administrative processing fee, will be timely refunded on completion of the project.

**Erosion Control Permit Cash Deposit (for less than one acre and all Residential Building Permits):** Prior to a building or and erosion control permit being issued, the land owner shall provide \$1000 cash deposit to the Village in order to provide a guarantee for construction site and erosion control maintenance and grading and drainage work at the proposed site. This cash deposit is required to guarantee to the Village that the requirements of the Ordinance are met. Such cash deposit would be deposited in an interest-bearing account and returned to the landowner only after the required items have been successfully completed and approved by the Village with the exception of a six (6) percent administrative finance processing fee. If the requirements are not completed, the Village will notify the owner to complete the required work within a reasonable time period. Upon failure to complete the work, the Village is authorized to complete the work and charge the work against the deposited cash and accrued interest. If the work completed by the Village is less than the deposited cash and accrued interest, the remainder will be returned to the landowner. Additional costs to complete the work will be assessed to the property at the end of the year and placed on the tax assessment roll.

The Village of Pleasant Prairie Office of Assessments creates and maintains property records for all real estate parcels within the Village of Pleasant Prairie in which it has jurisdiction. Pursuant to Wisconsin Statute 70.32(1), all properties that are issued building permits are field reviewed, described, and valued by "actual view". This means that each building permit requires: 1) assessment personnel to initially process existing records or create new records, 2) physically review, onsite, the purpose of each building permit to document all property description additions and/or alterations and 3) process the information gathered in the field to determine an assessed value.

### DEFINITIONS:

Residential – Used by occupants as a home, abode, domicile, or dwelling that has housekeeping and cooking facilities for the occupants only. A residential property may have multiple dwelling units.

Dwelling Unit – A single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, cooking, and sanitation.

Residential Condominium – A multiple dwelling or development containing individually owned dwelling units and jointly owned and shared areas and facilities.

Multi-Family Residential Building – A single building or structure containing more than one dwelling unit under single ownership and in which the owner rents or leases the right to occupy any of the dwelling units to a tenant(s).

Commercial Building – A building or structure that houses a business use, enterprise, or activity at a greater scale than home industry involving the distribution of, or retail or wholesale marketing of, goods or services.

Agricultural Building – A structure principally utilized for the storage of farm equipment and machinery, crop production, or shelter and feeding of livestock.

**FEES TO BE CHARGED FOR PROPERTY RECORD MAINTENANCE** – Every person receiving an approved building permit from the Village in which said building permit requires an employee of the Assessor's Office to physically view onsite any descriptive property change in an effort to maintain the property record shall pay a property record maintenance fee commensurate with the type of building permit issued by the Village.

**CALL THE ASSESSING DEPARTMENT AT 262.925.6726 WITH ANY QUESTIONS**

## SEWER CONNECTION FEES

Residential, per dwelling unit	\$1,600 per dwelling unit
Westwood Relief Sewer System	\$565 per residential user
Non-Residential: Commercial and Industrial	\$1,600 per meter equivalent

Pursuant to Chapter 285 of the Village Municipal Code, the following connection charge shall be paid for all residential and nonresidential customers prior to connection or issuance of a plumbing permit for any new or expanded use of the sanitary sewer system.

\*The connection fee for multifamily dwelling units shall be collected at the time the plumbing permit is obtained. If the multifamily dwelling unit is connected to municipal water, the owner of the property shall have the option from the 13th month of full occupancy of the multifamily dwelling to the 18th month to have an adjustment made in the connection fee. The adjustment would be based upon the following steps:

- Verification of the number of units occupied in a building.
- Calculation of the actual water to the building from the water meter readings.
- Dividing the actual volume by 365 or 366 in a leap year to create a daily volume.
- Dividing the daily by 210 [the average residential user equivalent].
- Multiplying the number of RUE's by \$1,600.
- Refund the difference between the two numbers if the initial payment was higher.
- Invoice to the property owner for the amount that represents an increase between the two numbers if the initial payment received from the property owner was lower.

Nonresidential: commercial and industrial \$1,600/meter equivalent. Meter equivalents are determined according to AWWA C-700 schedule of meter operating capacity as follows:

Water Meter Size (Inches)	Capacity	Meter Equivalent
5/8	20	1
5/8 x 3/4	20	1
1	50	2.5
1 1/2	100	5
2	160	8
3	300	15
4	500	25
6	1000	30

For commercial customers utilizing unmetered water supply or private wells, the meter equivalent shall be determined based on the total water supply fixture units of the building to be connected, converted to gallons per minute, in accordance with the State of Wisconsin Plumbing Code, Ch. COMM 82, Wis. Adm. Code.

The initial connection charge as set forth in this section for a new building shall be paid at the time that a building or plumbing permit is applied for. The initial connection charge for an existing structure shall be paid before the actual connection is made to the system.

## IMPACT FEES

Beginning August 1, 2005 the following Impact Fees shall be paid to the Village at the time that a building permit is issued for new development to finance the capital costs of acquiring, establishing, upgrading, expanding and constructing public facilities which are necessary to accommodate the new development.

- All other related Village costs, such as e-code amendments and the mailing and publishing of public notices and ordinances shall be based on actual billed costs.

\*\* Billing rates are subject to change by adoption of a Village Board Resolution and invoices will be sent at the billing rate in effect at the time billable services are provided.

As a condition of submitting the application, the applicant(s) and property owner(s) shall enter into a **Predevelopment Agreement** with the Village. The Village shall mail said invoices on a monthly basis to the specified person. All invoices shall be paid within 30 days. There is a penalty of 1.5% per month on the unpaid invoice balance and there is an additional 10% penalty if the outstanding invoice, interest & penalty is placed on the tax roll (a lien against the property). The right of the Village to assess a lien against the property shall be one of the remedies available to the Village, but shall not be the exclusive remedy. The Village may also sue for a money judgment for any invoices, which are past due. Furthermore, if an invoice becomes past due for more than 30 days, the Village may elect to terminate all staff review and to terminate the Village approval process on the application until all delinquent invoices are fully paid.

The Village shall invoice and the applicant/property owner(s) shall pay for the staff billable time and costs spent for processing and reviewing the plans, specifications, drawings and other documents submitted with respect to the proposed application, specific plans, plats, and maps for the development or project; for preparing memorandums and letters; for preparing, mailing, faxing, emailing and publishing meeting notices and agendas; for meetings, telephone calls and emails with the applicants, agents, developers, property owners, officials and neighbors; and inspecting the site/building/projects. Billable time includes preparing reports and documents for the Village Plan Commission, Village Park Commission, Village Board of Appeals, or Village Board; and any other Village staff time expended to review or analyze the applications, specific plans, plats, maps or development plans. Other charges included in the billable hours and costs are associated with:

- Preparing and publishing Village municipal code text and map amendments for the referenced application(s) from the Village's consultant. (Note: Invoices from the Village's General E-Code consultant are typically sent semi-annually, which often results in a time delay in sending final invoices from the Village to the owner/applicant);
- The Village staff seeking expert advice in meetings and reviewing and preparing correspondence regarding the specific plans, plats, maps, development plans or project, such as, but not limited to the Village's Attorney, Environmental Consultant, or Architectural Consultant expertise; and
- Requests from the agent/developer/property owners in gathering additional information; preparing GIS mapping; reviewing materials; preparing meetings, documents, letters, emails and other correspondence; and researching information for existing or speculative development proposals to assure that the proposed applications, specific plans, plats, maps, development plans, Digital Security Imaging System (DSIS) plans, reviews and inspection or project details are in compliance with the applicable Village, county, state or federal ordinances, rules and regulations and any approved plans or specifications.

The Village shall continue to invoice the applicant/property owner until final consideration is made regarding said application and all conditions have been satisfied, preconstruction meetings are held and inspections have been completed or said application is withdrawn in writing by the applicant/property owner(s). All invoices and all Village staff time and resources spent prior to the date of the written request to terminate the application shall be paid by the applicant/property owner(s). The Zoning Administrator may allow a cash deposit to be accepted by the Village to pay the invoiced amounts in lieu of sending an invoice to be paid. A Predevelopment Agreement is still required.

3. **Special fees.** The applicant/property owner shall pay to the Village Treasurer, upon presentment of an itemized statement, a fee equal to the actual cost incurred by the Village for all engineering, attorney and/or other special expert consultation or review conducted by or on behalf of the Village in connection with the review of an application or request for information; meeting with the applicant/property owner of a project or other engineering, attorney and/or special expert consultation or review services; or review, meeting, research of information for speculative development proposals incurred by the Community Development Department as the Village Zoning Administrator, Plan Commission and/or the Village Board may deem necessary to assure that the proposed application or existing plans or request are in compliance with the provisions of this chapter and the approved plans and specifications.
