

PUBLIC NOTICE

**PUBLIC INFORMATION MEETING
AT VILLAGE HALL AUDITORIUM
9915 39th AVENUE
PLEASANT PRAIRIE, WISCONSIN**

5:00 P.M. ON TUESDAY, NOVEMBER 29, 2022

The purpose of this notice is to inform you that the Federal Emergency Management Agency (FEMA) is in the process of revising the Flood Insurance Rate Maps (FIRMs) that determine the location of the regulatory floodplain adjacent to Lake Michigan in the Village of Pleasant Prairie. After they are finalized, these new maps, along with new land use restrictions specific to coastal areas along and near Lake Michigan, must be incorporated into the Village's Floodplain Zoning Ordinance in order for the Village's property owners to remain eligible for federal flood insurance.

The Village has conducted an initial evaluation of the changes being proposed by FEMA and has determined that properties adjacent to Lake Michigan may be impacted by these changes. Generally speaking, areas that are included within the regulatory floodplain are subject to land use restrictions applicable to new and existing development that exceed those that apply to areas not in the regulatory floodplain.

Attached to this notice, you will find information that may help evaluate the impacts of these proposed changes related to properties adjacent to Lake Michigan, including a copy of correspondence from FEMA outlining the next steps in the process to adopt their proposed changes and your opportunity to challenge the proposed changes, and maps generated from the FEMA website showing the changes in the regulated floodplain area at various locations in the Village.

The Village has also posted additional information on the Village's website at:

https://www.pleasantprairiewi.gov/departments/community_development/floodplain-coastal_areas_along_lake_michigan

During this public informational meeting, representatives from the Wisconsin Department of Natural Resources who will be attending virtually, will provide additional information and answer questions that you may have. If you have any questions regarding this matter, please direct them to:

Rick Sacbibit, Chief, Engineering Services Branch
Federal Insurance and Mitigation Administration
FEMA
400 C Street SW
Washington, DC 20472
(202)646-7659
Email: patrick.sacbibit@fema.dhs.gov
or visit the FEMA Map Information eXchange (FMIX) online at
https://www.floodmaps.fema.gov/fhm/fmx_main.html

It is possible that a quorum of members of other governmental bodies of the municipality may be in attendance in the above stated open house to gather information; no action will be taken by any governmental body at this open house.

Dated and posted this 4th day of November, 2022

OCT 11 2022

PLEASANT PRAIRIE

October 7, 2022

John Steinbrink
Village President, Village of Pleasant Prairie
Village Hall
9915 39th Avenue
Pleasant Prairie, WI 53158

Case No: 12-05-2816S
Community: Village of Pleasant Prairie,
Kenosha County, Wisconsin
Community No.: 550613

Dear Mr. Steinbrink:

On March 28, 2022, the Department of Homeland Security's Federal Emergency Management Agency (FEMA) provided your community with Preliminary copies of the revised Flood Insurance Rate Map (FIRM) and Flood Insurance Study (FIS) report for Kenosha County, Wisconsin and Incorporated Areas. FEMA has posted digital copies of these revised FIRM and FIS report materials to the following Website: <https://hazards.fema.gov/femaportal/prelimdownload/>. The Preliminary FIRM and FIS report include proposed flood hazard information for certain locations in the Village of Pleasant Prairie, Kenosha County, Wisconsin. The proposed flood hazard information may include addition or modification of Special Flood Hazard Areas, the areas that would be inundated by the base (1-percent-annual-chance) flood; base flood elevations or depths; zone designations; or regulatory floodways.

We have published a notice of the proposed flood hazard determinations in the *Federal Register* and will publish a public notification concerning the appeal process (explained below) in the *Kenosha News* on or about October 13, 2022, and October 20, 2022. We will also publish a separate notice of the flood hazard determinations on the "Flood Hazard Determinations on the Web" portion of the FEMA Website: https://www.floodmaps.fema.gov/flm/BFE_Status/bfe_main.asp. We have enclosed copies of the notice published in the *Federal Register* and the newspaper notice for your information.

These proposed flood hazard determinations, if finalized, will become the basis for the floodplain management measures that your community must adopt or show evidence of having in effect to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). However, before any new or modified flood hazard information is effective for floodplain management purposes, FEMA will provide community officials and citizens an opportunity to appeal the proposed flood hazard information presented on the preliminary revised FIRM and FIS report posted to the above-referenced Website.

Section 110 of the Flood Disaster Protection Act of 1973 (Public Law 93-234) is intended to ensure an equitable balancing of all interests involved in the setting of flood hazard determinations. The legislation provides for an explicit process of notification and appeals for your community and for private persons prior to this office making the flood hazard determinations final. The appeal procedure is outlined below for your information.

During the 90-day appeal period following the second publication of the public notification in the above-named newspaper, any owner or lessee of real property in your community who believes his or her property rights will be adversely affected by the proposed flood hazard determinations may appeal to you,

or to an agency that you publicly designate. It is important to note, however, that the sole basis for such appeals is the possession of knowledge or information indicating that the proposed flood hazard determinations are scientifically or technically incorrect. The appeal data must be submitted to FEMA during the 90-day appeal period. Only appeals of the proposed flood hazard determinations supported by scientific or technical data can be considered before FEMA makes its final flood hazard determination at the end of the 90-day appeal period. Note that the 90-day appeal period is statutory and cannot be extended. However, FEMA also will consider comments and inquiries regarding data other than the proposed flood hazard determinations (e.g., incorrect street names, typographical errors, omissions) that are submitted during the appeal period, and will incorporate any appropriate changes to the revised FIRM and FIS report before they become effective.

If your community cannot submit scientific or technical data before the end of the 90-day appeal period, you may nevertheless submit data at any time. If warranted, FEMA will revise the FIRM and FIS report after the effective date. This means that the revised FIRM would be issued with the flood hazard information presently indicated, and flood insurance purchase requirements would be enforced accordingly, until such time as a revision could be made.

Any interested party who wishes to appeal should present the data that tend to negate or contradict our findings to you, or to an agency that you publicly delegate, in such form as you may specify. We ask that you review and consolidate any appeal data you may receive and issue a written opinion stating whether the evidence provided is sufficient to justify an official appeal by your community in its own name or on behalf of the interested parties. Whether or not your community decides to appeal, you must send copies of individual appeals and supporting data, if any, to:

G. Fritz Statz
Wisconsin Department of Natural Resources/WW3
P.O. Box 7921
101 South Webster Street
Madison WI, 53707-7921
(608) 220-4290
Gordon.statz@wisconsin.gov

Additional copy to:

Munib Ahmad, FEMA Region 5
536 South Clark Street, 6th Floor
Chicago, Illinois 60605
munib.ahmad@fema.dhs.gov

If we do not receive an appeal or other formal comment from your community in its own name within 90 days of the second date of public notification, we will consolidate and review on their own merits such appeal data and comments from individuals that you may forward to us, and we will make such modifications to the proposed flood hazard information presented on the revised FIRM and in the revised FIS report as may be appropriate. If your community decides to appeal in its own name, all individuals' appeal data must be consolidated into one appeal by you, because, in this event, we are required to deal only with the local government as representative of all local interests. We will send our final decision in writing to you, and we will send copies to the community floodplain administrator, each individual appellant, and the State NFIP Coordinator.

All appeal submittals will be resolved by consultation with officials of the local government involved, by an administrative hearing, or by submission of the conflicting data to an independent scientific body or appropriate Federal agency for advice. Use of a Scientific Resolution Panel (SRP) is also available to your community in support of the appeal resolution process when conflicting scientific or technical data are

submitted during the appeal period. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. An SRP is an option after FEMA and community officials have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Please refer to the enclosed "Scientific Resolution Panels" Overview for additional information on this resource available to your community.

FEMA will make the reports and other information used in making the final determination available for public inspection. Until the conflict of data is resolved, and the revised FIRM becomes effective, flood insurance available within your community will continue to be available under the effective NFIP map, and no person shall be denied the right to purchase the applicable level of insurance at chargeable rates.

The decision by your community to appeal, or a copy of its decision not to appeal, should be filed with this office no later than 90 days following the second publication of the flood hazard determination notice in the above-named newspaper. Your community may find it appropriate to call further attention to the proposed flood hazard determinations and to the appeal procedure by using a press release or other public notice.

If warranted by substantive changes, during the appeal period we will send you Revised Preliminary copies of the revised FIRM and FIS report. At the end of the 90-day appeal period and following the resolution of any appeals and comments, we will send you a Letter of Final Determination, which will finalize the flood hazard information presented on the revised FIRM and FIS report and will establish an effective date.

If you have any questions regarding the proposed flood hazard determinations, revised FIRM panels, or revised FIS report for your community, please call our FEMA Mapping and Insurance eXchange (FMIX), toll free, at 1-877-FEMA MAP (1-877-336-2627) or e-mail the FMIX staff at FEMA-FMIX@fema.dhs.gov.

Sincerely,

Luis V. Rodriguez, P.E.
Director Engineering and Modeling Division
Federal Insurance and Mitigation Administration

DEPARTMENT OF HOMELAND SECURITY

FEDERAL EMERGENCY MANAGEMENT AGENCY

Proposed Flood Hazard Determinations for Kenosha County, Wisconsin

The Department of Homeland Security's Federal Emergency Management Agency has issued a preliminary Flood Insurance Rate Map (FIRM), and where applicable, Flood Insurance Study (FIS) report, reflecting proposed flood hazard determinations within Kenosha County, Wisconsin. These flood hazard determinations may include the addition or modification of Base Flood Elevations, base flood depths, Special Flood Hazard Area boundaries or zone designations, or the regulatory floodway. Technical information or comments are solicited on the proposed flood hazard determinations shown on the preliminary FIRM and/or FIS report for Kenosha County, Wisconsin. These flood hazard determinations are the basis for the floodplain management measures that your community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program. However, before these determinations are effective for floodplain management purposes, you will be provided an opportunity to appeal the proposed information. For information on the statutory 90-day period provided for appeals, as well as a complete listing of the communities affected and the locations where copies of the FIRM are available for review, please visit FEMA's website at https://www.floodmaps.fema.gov/fhm/BFE_Status/bfe_main.asp, or call the FEMA Mapping and Insurance eXchange (FMIX) toll free at 1-877-FEMA MAP (1-877-336-2627).

Effective

Preliminary

Effective

Preliminary

* A Base Flood Elevation is the expected elevation of flood water during the 1% annual chance storm event. Structures below the estimated water surface elevation may experience flooding during a base flood event.

Hazard Level

High Flood Hazard

Flood Hazard Zone

AE, A, AH, AO, VE and V Zones. Properties in these flood zones have a 1% chance of flooding each year. This represents a 26% chance of flooding over the life of a 30-year mortgage.

Moderate Flood Hazard

Shaded Zone X. Properties in the moderate flood risk areas also have a chance of flooding from storm events that have a less than 1% chance of occurring each year. Moderate flood risk indicates an area that may be provided flood risk reduction due to a flood control system or an area that is prone to flooding during a 0.2% annual chance storm event. These areas may have been indicated as areas of shallow flooding by your community.

Unshaded Zone X. Properties on higher ground and away from local flooding sources have a reduced flood risk when compared to the Moderate and High Flood Risk categories. Structures in these areas may be affected by larger storm events, in excess of the 0.2% annual chance storm event.

Low Flood Hazard

Insurance Note: High Risk Areas are called 'Special Flood Hazard Areas' and flood insurance is mandatory for federally backed mortgage holders. Properties in Moderate and Low Flood Risk areas may purchase flood insurance at a lower-cost rate, known as Preferred Risk Policies. See your local insurance agent or visit <https://www.fema.gov/national-flood-insurance-program> for more information.
